Summary

Java Full Stack Developer (B.Tech CSE, 2026) skilled in Spring Boot, Spring Data JPA, MySQL and React.js. Built and deployed FarmBridge, a multi-role marketplace with Docker and GitHub Actions CI/CD, and designed a microservices e-commerce system using Eureka and RabbitMQ. Seeking a Java Full Stack Developer role to build and ship end-to-end web applications.

Technical Skills

Languages: Java, SQL, JavaScript (ES6+), HTML5, CSS3

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, RBAC

Frontend: React.js, React Router, Context API, Axios, Tailwind CSS

Database: MySQL, JPQL, Schema Design

Testing: JUnit 5, Spring Boot Test, MockMvc, Postman

DevOps & Tools: Docker, GitHub Actions (CI/CD), Nginx, Git/GitHub, Maven, Swagger

Deployment: Vercel, Render

Experience

Full Stack Development Trainee Mar 2026 – Sep 2026

Student Tribe | Java, Spring Boot, React.js, MySQL

- Completed a 6-month hands-on full stack development program covering Java, Spring Boot, React.js and MySQL
- Built the React.js frontend of an e-commerce application with product browsing, cart, wishlist and payment-order workflow, and deployed it on Vercel
- Followed Git and GitHub workflows, committing and pushing code in stages across multiple repositories

Projects

FarmBridge – Farmer-to-Buyer Marketplace | *Spring Boot, React, MySQL, Docker, GitHub Actions* 2026

- Built a marketplace where Admin, Farmer and Buyer roles each get their own access, covering products, orders, reviews and wishlist
- Developed notifications, reviews and farmer verification features
- Containerized with Docker and deployed live on Render with a GitHub Actions CI/CD pipeline
- Live: farmbridge-frontend.onrender.com | Code: GitHub

my-store-app – E-Commerce Frontend | *React.js, React Router, Context API, Axios* 2026

- Built the React.js frontend of an e-commerce application covering product browsing, cart, wishlist and payment-order workflow
- Implemented routing with React Router, managed cart/wishlist state with Context API, and connected to backend REST APIs using Axios
- Deployed on Vercel: Live Demo | Code

E-Commerce Microservices Application | *Spring Boot, Eureka, RabbitMQ, MySQL, Spring Data JPA* 2025

- Designed a microservices architecture with 4 independent services (Product, User, Cart, Order) exposing REST APIs
- Implemented service discovery with Eureka so services find and call each other without hard-coded URLs
- Integrated RabbitMQ for asynchronous order processing, decoupling the Order service from the other services
- Code: GitHub

Education

AVN Institute of Engineering and Technology 2022 – 2026
B.Tech in Computer Science and Engineering *CGPA: 7.67/10*

Trinity Junior College, Karimnagar 2020 – 2022
Intermediate (MPC) *871/1000*

ZPHS Garrepally 2019 – 2020
SSC *GPA: 9.3/10*

Certifications

TCS iON Career Edge – Young Professional 2025
Infosys Springboard – Generative AI 2025
